OBJECTIVES

Objective: To leverage my extensive experience in Full Stack Web App Development and Desktop Application Development to contribute to innovative and impactful projects. Seeking a challenging role where I can apply my skills in front- end and back-end technologies, as well as my proficiency in desktop application frameworks, to deliver high-quality, scalable, and user-centric software solutions.

EXPERIENCE

1/2018 - 5/2022

Computer Operator
At Oxford Group Of School

I worked as a Computer Operator at Oxford Group of Schools from January 1, 2018, to August 20, 2022. During my tenure, I efficiently managed computer systems, ensured smooth IT operations, and supported administrative tasks. My role included maintaining databases, troubleshooting technical issues, and assisting staff and students with computer-related needs, contributing to the overall productivity and technological advancement of the school.

1/2018 - 5/2022

Data Entry Operator
At Oxford Group Of School

I worked as a Data Entry Operator at Oxford Group of Schools from January 1, 2018, to August 20, 2022. In this role, I was responsible for accurately entering and updating data into the school's databases and systems. My tasks included managing student and staff records, processing enrollment information, and maintaining meticulous attention to detail to ensure data integrity. I also collaborated with administrative staff to streamline data-related processes, contributing to the efficient operation of the school's administrative functions.

1/2019 - Present

WordPress Development
At Self Employed

Since January 1, 2018, I have been working independently as a WordPress Developer. During this time, I have successfully designed and developed numerous WordPress websites, tailoring them to meet the unique needs of various clients. My responsibilities include creating custom themes and plugins, optimizing site performance, and ensuring robust security measures. I excel in transforming client ideas into functional, user-friendly websites, and staying updated with the latest WordPress trends and technologies to provide cutting- edge solutions.

1/2020 - Present

Full Stack Web Developer
At Self Employed

Since January 1, 2020, I have been working as a Full Stack Web Developer. In this role, I specialize in both front-end and back-end development, creating dynamic and responsive web applications. My expertise includes working with HTML, CSS, JavaScript, and frameworks like React or Angular for front-end development, as well as Node.js, Express, and databases like MongoDB and SQL for back-end development. I am adept at integrating APIs, ensuring cross-platform compatibility, and optimizing performance. My focus is on delivering seamless user experiences and robust, scalable solutions for various web projects.

1/2020 - Present

Full Stack Web Application development
At Self Employed

Since January 1, 2020, I have been engaged in Full Stack Web App Development. During this period, I have developed a range of web applications from concept to deployment, handling both front-end and back-end tasks. My front-end expertise includes technologies like HTML, CSS, JavaScript, and frameworks such as React or Angular, while my back-end skills encompass Node.js, Express, and databases like MongoDB and SQL. I am proficient in integrating RESTful APIs, ensuring responsive design, and optimizing application performance. My goal is to create efficient, scalable, and user-friendly web applications that meet client needs and industry standards.

1/2018 - Present

Desktop Application development
At Self Employed

Since January 16, 2018, I have been involved in Desktop Application Development. In this role, I have designed, developed, and maintained various desktop applications tailored to meet client-specific requirements. My work involves using programming languages such as C#, Java, and Python, along with frameworks like .NET and JavaFX. I focus on creating user-friendly interfaces, ensuring application stability, and optimizing performance. My projects range from simple utilities to complex software systems, all aimed at enhancing productivity and providing robust solutions for desktop environments.
